

handyOrder is a system that allows sales personnel to perform order entry, inventory monitoring and AR (Accounts Receivable) enquiries via an on-line Tablet PC or PDA (Personal Digital Assistant). This provides an on-line real-time ordering process on wireless mobile network such as GPRS (GSM and SMS as option).

handyOrder is supported on Tablet PC or PDAs running on Pocket PC, Palm OS & Symbian. And it is designed to integrate easily and seamlessly with any ERP or CRM systems.

FEATURES of *handy Order*

Order Entry

handy Order allows sales representatives to perform on-line real-time sales order entries. Sales Order Entry's feature also allows editing of sales order information before submission and real-time inventory update after the sales order input. In addition, it also supports signature capturing for order acknowledgement.

Order Status

This feature enables sales representatives to check on the current status for any order submitted.

Customer Information

This feature allows the latest customer information and account details to be downloaded on demand or by batch. The User can also view the accounts receivable status and request a copy to be forwarded via fax.

Product Information

This unique feature allows the sales representative to view and retrieve a product's code, description, list price, stock level and any required fields that can be customized to specific clients.

Sales Target

This feature allows the sales representative to view monthly sales target set by the company and view up-to-date sales performance.

Schedule

The schedule feature allows sales representatives to login to the corporate intranet server on their PDA to view his/her weekly schedule for appointments and meetings.
